## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: dwIOC in Fig. 1; wl, le, t6, t1', t2' and t3' in Fig. 2; wl, le, bl, t6, t1', t2' and t3' in Fig. 3; DUMMY CELL ADDRESS COUNTER 34 in Fig. 4; OTHER COMMAND in Fig. 6; 20B in Fig. 9; WL select Address, Block select Address and rf<0> to rf<I+1> in Figs. 10-11; 1-bts, 1-wl, 1-dwl, 1-dcp and 1-le in Figs. 13-14. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not understood the feature of "a plurality of memory cells which are coupled to the first bit line" and the feature of "a dummy cell which is coupled to a second bit

line". Since Fig. 1 does show that memory cells and dummy cells are coupled to both bit lines BL and /BL.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kitamoto et al., 5,889,718.

Kitamoto et al., 5,889,718, discloses in Fig. 2 a memory device comprising:  
bit lines BL0 and BL0X;  
memory cells MS;  
dummy cells DS;  
sense amplifier 1;  
control circuit, comprising transistors Q8 and Q9, for charging dummy cells with a predetermined potential V2 during the fixed time precharge period as shown in Fig. 3.  
as shown in Fig. 4, memory cell blocks 20 and 30.

***Allowable Subject Matter***

6. Claims 3-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

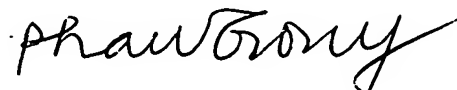

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
